

Borris Rug

 [landsorten.dk/kornsorter/Borris Rug](https://landsorten.dk/kornsorter/Borris%20Rug)

Landsorten

Borris Rug is the oldest Danish rye variety and was bred at Borris Research Station in 1949 based on an old Danish rye variety. The variety was specially developed as bread rye for poor soils, but can also be grown on better soil. The variety is suitable for both bread baking and as food grain and is also used for whisky production.

General

Parents	Borris Rye
Cultivated by	Enghaven og Ulvedal
Seed color	Blue
Origin	Opformering af genbank-materiale
Diversity	Homogen
Crop type	Winter rye
Awns	No
Bunt resistance	No
Mildew resistance	No
Rust resistance	No
Requires dehulling	No

Traits

Gluten strength	Ingen data
------------------------	------------

Traits

Protein content	Ingen data
Plant height	Ingen data
Seed hardness	Ingen data
Ripening	Ingen data
Lodging	Ingen data
